

METHOD FOR REGISTERING A BIOMETRIC FOR USE WITH A SMARTCARD

Abstract

The present invention discloses a method for registering biometric information for use in a smartcard-reader system. The method comprises the steps of contacting an authorized sample receiver and submitting a biometric to a sensor to facilitates the sensor in obtaining a biometric sample. The method also includes providing user information and smartcard information to the smartcard-reader system to facilitate associating the biometric sample with the user and smartcard information.
